Subject: Map of Zone 1 for use on web site

Michael – is it possible to get an electronic version of the map of Zone 1, i.e. the West Calumet Housing Complex, without addresses or indication of “hot spots” that we can place on the new web page? I wondered whether the addresses were just a layer that could be removed. We have a map showing all three zones, but it would be better to focus on the neighborhood where we will be working in the next several weeks.
